

Public Open House

December 6th, 2022: 5:30 - 7:00 p.m.
Alpharetta City Hall Rotunda

The City of Alpharetta has engaged a set of planning experts to develop the South Main Street Livable Centers Initiative (LCI) Study, which includes the area along South Main Street (Hwy 9) from the Town Center south to the city limits. This nearly complete plan seeks to develop opportunities for safe walking and biking while promoting transit ridership. It also aims to examine opportunities for redevelopment that promote creative placemaking and the continued success of the Downtown Alpharetta LCI.

Join us at the final public open house to share your feedback on the proposed concepts for this study area and help shape the future of the South Main area!
